 / liscio decorative floors & coatings

LISCIO (SOLID COLOR) METALO Rust-Go is a rust inhibitive SOLID Colour coat which converts rust into non corroding iron tannate, Provides a long term protection against corrosion and biological degradation, Stabilises the iron surface by avoiding further oxidation, Strong Chemical bonding, Moisture if any, will be emulsified into the film during Application of 2 coats and will evaporate while drying, Functions as an adhesion promoter, No need to apply any Primer. LISCIO (SOLID COLOR) METALO Rust-go can be Applied internal and external surface of Metal Last for more than 10 years. It is widely used by Engineers and Architects & Interior designers for their long lasting & quick Executing Concepts and ideas.
