### ***Dressing up the Surfaces***

The interior of a dwelling should be dressed up well to suit the mood of the inhabitants. Be it home, office or a commercial premise, LISCIO always believes in 'dressing up the surfaces' to symbolise the theme of the people dwelling in it.

LISCIO is the synonym of quality and innovation in the construction and architecture industries which are constantly updating with new materials and framework. LISCIO is continuously updating its range of products to reach higher benchmark of efficiency and effectiveness. LISCIO is constantly innovating construction chemicals serving new experience to the existing markets, solving customer's pain points and encouraging higher standards in construction industry.

LISCIO products are ideal not only for decorating interior walls, surfaces and furnishings, but also for restoring old buildings and constructions with weather-proof solutions.

LISCIO proudly announces our new range of LISCIO TEXTILE G-FIBRE WALL COVERINGS which is a wide range of woven and non-woven glass-fibre wall coverings for reinforcement, protection and decoration of walls and ceilings. Our range imparts opulent textured finish to the damaged wall and its unique features prevent and protect walls from multiple problems like dryness/dampness, hairline cracks, moisture, dents, fungus formation, mold and scratches etc.

LISCIO TEXTILE G-FIBRE WALL COVERINGS are available in three major variants: paintable, printable and ready-to-use. Our specialty range consists of mold resistant wall covering, clean air wall covering, and acoustic wall covering. It is a green product, non-toxic, and fire resistant.

### **FEATURES AND BENEFITS**

#### **High Tensile Strength**

To prevent propagation of hairline wall cracks

#### **Vapor Permeability**

Porous and breathable glass fibres protect walls from moisture, dryness and dampness

**Non-Toxic Material**

Wall coverings are made of glass fibres e.g. silica with zero-toxicity

**Fire Retardant**

TEXTILE G-FIBRE wall covering is IMO certified for smoke, toxicity and surface flammability

**High Impact Resistance**

It protects wall from high impact, wear & tear, scratches, marks and dents

**Clean Air property**

Coating on the TEXTILE G-FIBRE wall covering helps absorb VOC from the environment and improves indoor air quality

**Long Service Life**

Lasts more than 12 years, thus reducing maintenance cost

**Scrubbable**

It is easy to maintain. Accumulated dirt can be easily wiped out using wet sponge and water
